Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

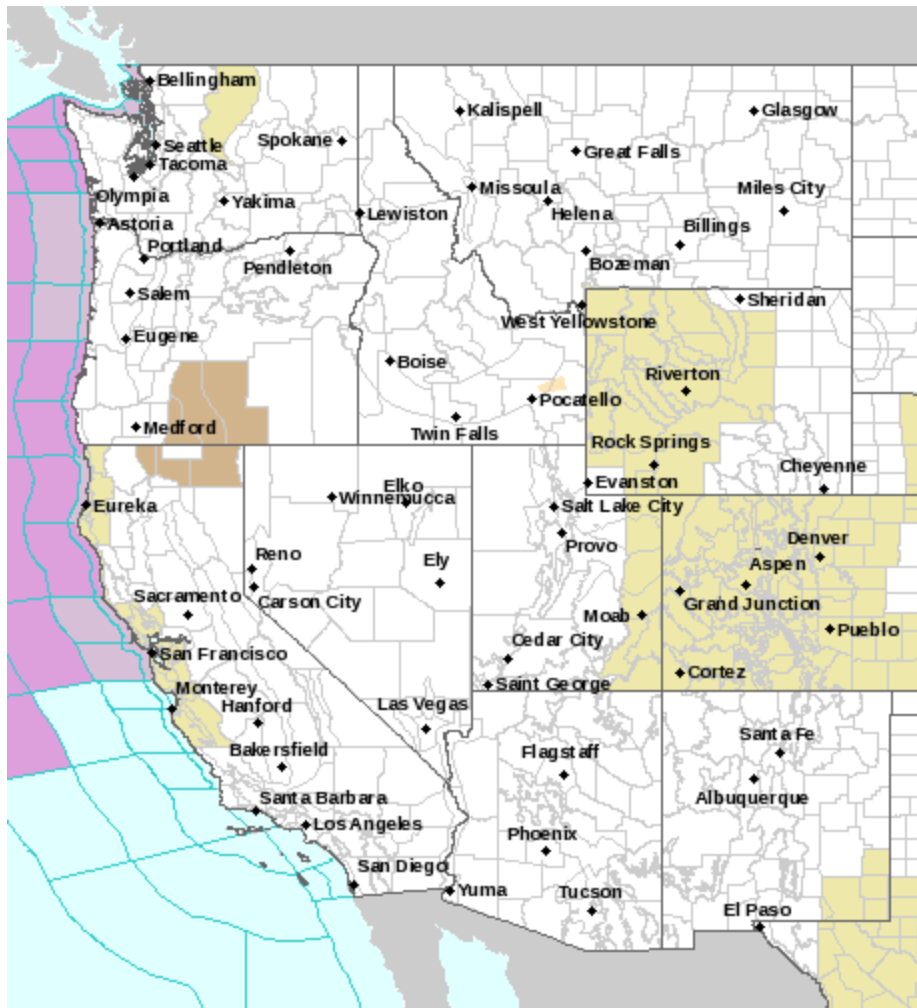

NORTHERN CALIFORNIA

A front and an area of light to moderate rain has advanced near Interstate 80 this morning. It will most likely stall out there this morning and begin backing to the northwest this afternoon. The far eastern and southern portions of the region will continue to see little to no rainfall from this system. Snow levels are 7000 feet or higher. Another front will set up along the north coast tonight and Wednesday and begin moving slowly inland on Thursday. Inland areas will remain partly cloudy and breezy during this time. Late on Thursday a Pacific low pressure system will approach central California. Scattered showers will spread into the region Thursday night and Friday. Another strong front will reach the north coast with rain and gusty south winds late in the weekend into early next week.

SOUTHERN CALIFORNIA

Warmer and drier weather can be expected today and Wednesday as high pressure temporarily builds into the area. Expect afternoon readings to reach the 50s to lower 60s in the mountains, 70s in the valleys and up to 80 in the San Joaquin Valley. Winds are expected to remain light. Some coastal stratus will likely develop tonight. Wednesday, expect temperatures to warm 3-5 degrees over most locations. South winds of 15-25 mph will develop in the late afternoon and evening in the mountains and in the Owens Valley Wednesday afternoon. Thursday, a weakening system will reach Central California, spreading showers to the central coast by afternoon and the Sierras toward evening. Gusty south winds will be possible Thursday night as the system begins to move inland. A few thunderstorms will also be possible, mainly north of Point Conception. The storm should bring a continuous 4-6 hour band of moderate rain to the central part of the state, but this band should weaken as it moves into areas south of Santa Barbara County Friday morning. Rainfall will taper off from north to south Friday afternoon. In all, expect 1-2" of rain over favored south aspects of the Central Coast and Sierras. The south aspects of Santa Barbara County and Ventura County may see 1" while areas further south and east likely recording 0.25-0.50" A few showers may linger in the Sierras Saturday, but the rest of the area should see partly cloudy and seasonally cool weather. Another storm will likely bring rain to Central California Sunday, but most of the precipitation will remain north of the area. No offshore winds are expected the next 7 days.
